

# Independence

In countries like Tunisia sleeping on the floor is normal due to money and cultural reasons. For people who are disabled, getting into a wheelchair unassisted can be a real problem

The solution provides an easy and cheap method for those affected to get in and out of their wheelchair independently. The product will come in the form of instructions or a jig and will be made locally by the community

Person pivots around and up each level for an easy transition into wheelchair

Ergonomically designed to fit 5th to 9th percentile
